

Do You Want to Create Your Loved One with AI?

You'll need to supply us with a few things.

1. A few pictures or high resolution video (cellphone 4k best, 1080p ok) of your loved one.
2. Some voice recordings of them, preferably professionally recorded up to 1.5 hours. Cellphone video or audio files will do.
3. Writings, Notes, journal entries, friends' descriptions of behavior or stories, blog posts, social media posts and links- anything that captures their personality.

We then take your family content and process it into a chatbot. Realtime speaking LovedOnes are available too.

Starting at \$497. Create custom Chatbots of your loved ❤️ ones today!
